Working together to help you live a healthier life

PRIME THERAPEUTICS®

WHAT IS A SPECIALTY MEDICINE?

Specialty medicines are prescribed to treat chronic, complex or rare conditions such as cancer, rheumatoid arthritis and hepatitis C. They're typically different from traditional medicines because they:

- Require special storage, temperature and handling requirements
- Are given by infusion, injection or taken orally
- Need to be taken on a strict schedule
- Cost more than regular medicines
- Require close patient monitoring and ongoing support

PERSONALIZED SERVICE

You'll have a personal Care Team available to offer one-on-one support.

The Care Team will:

- Make sure your medicine is shipped to you correctly so you'll have what you need when you need it.[3]
- Help you learn how to take and store your medicine and stay on schedule
- Help you with insurance and work on your behalf to get prior authorization from your health plan when needed.
- Help find financial assistance options when available.
- Help you solve for any side effects you experience.
- Be there when you need them, 24/7.[4]
