# Picture life on your terms

## Your life is bigger than your diagnosis

You may have a health problem or illness that calls for medication and extra health support. We know that people live full lives not defined by a diagnosis.

Prime Therapeutics Specialty Pharmacy (Prime Specialty Pharmacy) wants you to have the tools you need. We believe the right tools can help you control your condition and not have it control you.

Medication is only one piece of a complete health picture.

At Prime Specialty Pharmacy, we want to help you take charge of your condition. Our support programs and services can help you get the most from your medication.

We help you take charge of your medications so you can go on to live a healthy, productive life.

Prime Specialty Pharmacy gives you complete support.

# We're here to help

## Medication

We package your medication carefully for special handling and temperature control. The package will include all the supplies you need. You will also receive educational materials that cover treatment and possible side effects. Count on receiving your medication and supplies on time, when you need them.

## Insurance

We'll also help you manage your health insurance for your specialty medications. We'll help you understand your benefits. We can answer questions about your benefits by working directly with your health insurance company. We take care of billing your insurance company.

## Support

You'll have the support of a skilled care team. It includes nurses, pharmacists and service professionals who understand your condition and its treatment. If you are having trouble affording your medication, we can provide information about financial assistance programs. We're as close as your phone. We want you to have the information and guidance you need.

## What are specialty medications?

Specialty medications are prescribed to treat complex and chronic (long-term) conditions. Examples include multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis.

One or more of the following may also be true about these high cost medications:

- They are injected or infused, but some may be taken by mouth
- They have unique storage or shipment requirements
- Additional education and support is required from a health care professional
- They are usually not stocked at retail pharmacies
